

Maintenance Interior

MAINTENANCE PROCEDURE

INTRODUCTION

VITRAPANEL® Interior designates modular interior wall or ceiling panelling factory-finished in highly durable and spectacular VITRATHANE® coating system. Substrates include MDF and plywood.

CARE

General Regular Cleaning:

This is best carried out with a sponge or soft cloth and any household cleaning detergents or solvents. Abrasive cleaning agents must not be used.

Polishing:

The product is suitable for polishing with a soft cloth if required.

Graffiti Removal:

Pressure pack (i.e. paint) damage is usually easily removed by wiping with a mineral turpentine saturated rag within 48 hours of application.

Felt tipped marker damage should be removed using methylated spirits - again within 48 hours.

Mechanical Damage:

Should the panels be physically scored, chipped or scraped in any way please consult the manufacturer for the best method of repair/replacement.

Scratch damage can usually be repaired simply by application of the top coat colour (available from the manufacturer) using a fine camel hair brush.

DISCLAIMER:

Since the use and application of this product is beyond our control we cannot be held responsible for product field performance. The information represented above is the result of our considerable experience with this product but is not to be construed as a performance warranty.
