

VITR PANEL® CUSTOM IMAGE

QEIJ Jubilee Hospital, Brisbane

A decorative architectural product for external wall application that allows designers to freely express their unique graphic designs. Compressed fibre cement panels that will retain both colour and gloss for a minimum of 15 years. Display unique designs on these high quality and affordable panels.

Your high resolution photographic images and digital designs can be reproduced in full colour or black and white.

QEIJ Jubilee Hospital, Brisbane
QLD Department of Public Works

Architect: **Hames Sharley**, Karl de Beer (chief architect)

Artist: Gary Carsley and Louise Sykes

Photographer: David Sandison

Finished Building

Photographer: Stephen Nicholls

CASE STUDY

Sir Charles Gairdner Hospital Perth

Architect: JCY Architects and Urban Designers

Artwork: Anne Neil

Product: VITRAPANEL Custom Image

VITRAPANEL Custom Image gives the designer, architect or owner a chance to make an individual artistic contribution to the design of a building. With the use of LUMIFLON in our coating technology we can warrant the image in terms of gloss retention and colour stability for 15 years.

The process is simple

Concept → Consultation → Design → Sample → Approval → Specification

We have manufactured **VITRAPANEL Custom Image** for a large number of projects and the satisfaction from designer to owner and everyone who comes into contact with the project has been amazing.

Projects range from a few panels to +3,000 m².

The panels are prepared by **VITRAGROUP** with proprietary coating ready for digital printing, the image is loaded and the panel is printed on a state of the art flat bed digital printer, after printing they are coated with a proprietary clear coating, based on LUMIFLON, to the nominated gloss level (normally satin).

CASE STUDY

Waringarri Bush Medicine Project - KUNUNURRA HOSPITAL

Architect: Bateman Architects, Perth

Artists: Waringarri Aboriginal Arts

Product: VITRAPANEL Custom Image

The original art work was scanned using a high quality professional scanner organised by **VITRAGROUP** the scanned image was then scaled up to 33 x 3 m. This image was then digitally printed on **VITRAPANEL Custom Image** panels and installed as the "Bush Medicine Wall"

Artwork → Scanning Process → Graphic Image → Printing
→ Finished Panel

"I enjoyed this project, it made me happy to learn with other artists. Now I am proud to see the finished wall and proud my kids can also see it." **Gloria Mengil ARTIST**

Works of art can be used as the image on **VITRAPANEL Custom Image** panels using the above technique with confidence of reproducing an authentic image and a **15 year warranty**.

VITR PANEL® CUSTOM IMAGE

“This project offered the perfect canvas for a culturally inclusive artwork developed from the outset with the local community. It inspires contemplation on notions of coexistence and respect for the landscape and its life forms.” - Bridget Norton
